## **DETAILED ACTION**

This action is in response to the Application filed on 6 January 2004 in which claims 1-8 are pending.

## **Drawings**

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

Application/Control Number: 10/752,387

Art Unit: 2614

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,808,402. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of the claims in the present application are covered by the scope of the claims in the patent with obvious wording variations; for example, Ryu et al (U.S. Patent No. 6,808,402) teaches A portable wireless terminal comprising: a main body housing, a folder housing; a hinge module which is received within the center hinge arm and which rotatably connects the folder to the main body; and a hinge dummy, wherein the hinge module comprises: a) a hinge housing; b) a hinge shaft; c) a hinge cam, in addition to other examples comparable examples between the application and patent.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art in view of Braxton (6,134,121).

Application/Control Number: 10/752,387

Art Unit: 2614

Page 4

Applicant's admitted prior art discloses generally all that is claimed (see pages 1-3 and

fig. 1) except that the housing 111 of the main body 110 and the housing 151 of the folder 150

are not coated with an electrically conductive material on the inner surface in order to provide

EMI shield.

Braxton teaches the housing 114 is coated with an electrically conductive material on the

inner surface 117 in order to shield EMI generated by electrical component 106.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the

invention was made to modify Applicant's admitted prior art by constructing the inner surface of

the housing as taught by Braxton in order to shield EMI generated by electrical component inside

the portable wireless terminal 100 and thus protecting the user from EMI exposure.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Phylesha L. Dabney whose telephone number is 571-272-7494.

The examiner can normally be reached on Mondays, Tuesdays, Wednesdays, Fridays 8:30-4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Curtis Kuntz can be reached on 571-272-7499. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

P O Box 1450

Alexandria, VA 22313-1450

Or faxed to:

(703) 273-8300, for formal communications intended for entry and for informal or draft communications,

please label "Proposed" or "Draft" when submitting an informal amendment.

Hand-delivered responses should be brought to:
